

## **Quality Manager Position**

SCI Engineered Materials, a registered ISO 9001:2000 supplier of high technology materials to the electronics industry, is seeking a dedicated, detail oriented, Quality Assurance specialist for the position of Quality Manager. SCI is a small business experiencing substantial annual growth in a marketplace where high quality is the requirement. The Quality Manager will be responsible for maintaining SCI's quality system, interfacing with customers regarding quality issues and customer satisfaction, maintenance and calibration of inspection and analytical equipment, and assisting manufacturing in managing the cost of quality. A candidate for this position must have at least 3 years of experience in quality management (with at least two years managing an ISO 9001:2000 registered quality system), have passed training as an internal auditor (ISO 9000:2000 Series Lead Auditor Preferred), and a BS degree in engineering, science, or quality management. Knowledge and experience with TS16949 compliant systems a plus. If you want to join a team of highly motivated professionals in a fast paced, challenging opportunity please fax or e-mail your resume to Dr. Scott Campbell at (614) 486-0912 or [scott@sciengineeredmaterials.com](mailto:scott@sciengineeredmaterials.com) .
